PROFESSIONAL SUMMARY

DevOps Engineer with 2 years of hands-on experience building and maintaining CI/CD pipelines, container orchestration, and cloud infrastructure on AWS. Experienced in Kubernetes, Terraform, Docker, Jenkins, ArgoCD, Kafka, Grafana, and Prometheus. Adept at collaborating with cross-functional teams to deliver reliable, scalable, and automated infrastructure solutions.

TECHNICAL SKILLS

- **CI/CD & Automation:** Jenkins, ArgoCD, GitHub Actions, Helm
- **Containers & Orchestration:** Docker, Kubernetes (EKS), Helm Charts
- **Cloud Platforms:** AWS (EC2, S3, EKS, VPC, IAM, CloudWatch)
- **Infrastructure as Code & Monitoring :** Terraform, Ansible, Grafana, Prometheus
- **Messaging & Databases:** Kafka, MySQL, Couchbase
- **Scripting & Languages:** Python, Bash/Shell, Linux
- **Protocols & Networking:** Diameter Protocol, IWF, VPC, Distributed Stack

WORK EXPERIENCE

Telaverge Communications, Bangalore — R&D Engineer

Aug 2024 – Present

- Designed and optimized end-to-end CI/CD pipelines using Jenkins and ArgoCD, automating full deployment workflows for the Regal Development Operations project.
- Built a complete automation testing infrastructure covering installation, functional testing, and load testing — integrated Grafana and Prometheus dashboards for real-time monitoring.
- Automated the customer Sales and CCP onboarding flow, from environment setup to test report generation and email delivery, reducing manual effort by ~60%.
- Worked with the Diameter protocol team to support enterprise clients including Amdocs, Cerilion, and Mavenir on telecom infrastructure integrations.
- Improved operational efficiency by 20% through workflow standardization and pipeline automation for Regal testing.
- Stack: AWS (EC2, EKS), Kubernetes, Docker, Jenkins, ArgoCD, Terraform, Ansible, Grafana, Prometheus, Python, Linux, Kafka, Diameter, Distributed Stack, IWF

Telaverge Communications, Bangalore — Software Engineer Intern

Mar 2024 – Aug 2024

- Contributed to frontend development using ReactJS, JavaScript, HTML/CSS, and MongoDB, collaborating with the design team via Figma.
- Gained practical experience with CI/CD tools (Jenkins, ArgoCD), Docker, Kubernetes, and Git/GitHub version control in a production-adjacent environment.

PROJECT WORK

- Two-Tier Web Application with Jenkins & Docker — Built a containerized two-tier app with a fully automated CI/CD pipeline using Jenkins; includes automated image builds, testing, and Docker Compose deployment.
- Three-Tier Web Application with Kubernetes — Architected a production-grade three-tier application (frontend, backend, database) on Kubernetes with service discovery, ingress, and horizontal pod autoscaling.
- Cloud Infrastructure with Terraform — Provisioned complete AWS infrastructure (VPC, EC2, S3, security groups, IAM) using Terraform IaC; deployed reusable modules for multi-environment use.

EDUCATION

Bachelor of Engineering — Computer Science

Aug 2020 – Aug 2024

Dronacharya College of Engineering, Gurugram

- Relevant coursework: OOP, Data Structures & Algorithms, Operating Systems, Computer Networks, Database Management etc.
